Orthodontist

Lifelong resident of Brigham City

Dear friends and neighbors,

You know me as a voice for good government, conservative principles, historic preservation, and economic development.

Since you elected me to the Utah Legislature we have balanced the budget, passed reasonable legislation and won praise as the nation's best managed state. We face our fair share of challenges but I wouldn't trade our communities or the abilities of our people with any other state in the nation.

Our district should have a senator with experience and common-sense. You don't have to guess at what I think is important. Here are my priorities:

- Listen and learn from my constituents.
- Local economic development. (Jobs!)
- Efficient government.
- Responsible tax policy.
- Government that spends less than it brings in.
- The right balance between local, state and federal government.
- Education.
- Preservation of Utah's pioneer heritage.
- Diverse, efficient energy production.
- Immigration reform.
- The values and priorities of the citizens in my senate district.

I have faith in our communities, our heritage, our people and our system of government. I believe I'm qualified to be your senator and I hope I have earned your trust. I'm asking for your vote on November 2nd.
